

# Earth's Classroom

## 7th Annual Friendly Living Gathering

Saturday, January 21st, 2012

9:30 am—5:00 pm

Members: \$19/person

Nonmembers: \$24/person

Limit: 8-22 participants

Location: Founder's (Bill and Jody's) Home

Would you like a \$50 monthly energy bill or less? Have you thought about living a more sustainable life style? Are you or do you know someone whom is remodeling or building a home? If you said yes to *any* of these questions, participating in this program could greatly benefit your goals. Join the Founders of Earth's Classroom as we spend the day looking at three homes and the lives of the families occupying them. Take the opportunity to learn from their adventures of a more sustainable lifestyle.

First Home: (South of Rosebud, MO) Owned by the Founders of E.C., their 1,900 sq. foot home is built from used St. Louis lumber, 2X6 framed and post and beam, story and ½ home, partial in ground, passive and active solar, with many other additives to make it efficient. Lunch will be served here.

Second Home: (4-5 miles away from home #1) A gorgeous work of art, this home is a round cordwood home with a sod roof, 34 ft. in diameter, composting toilet, 2-story, made from all reused materials and built for less than \$10,000.00!

Third Home: (Approximately 25 miles from home # 2.) This home is an Octagon shaped, Nebraska style straw bale home. Simplistic in design yet very efficient, learn the benefits of its structure. In addition, let them share with you the life of living off grid with a power source coming from photovoltaic cells.

*Upon making your reservation you will receive detailed directions to the First Home.*

*Please be prepared to carpool and/or commute from home to home.*

*For additional information call (573) 437-7628 or visit [www.earthclassroom.org](http://www.earthclassroom.org)*
